PAST - PRESENT - FUTURE

Dear Colleagues and Friends

It is a particular pleasure and honor to invite you to this year's meeting in Lugano.

We have the chance to reflect together on the past, present and the future of our beloved and unique discipline with a particular focus on the changes, which ourselves and especially the young generation of plastic surgeons will face throughout their careers.

We have to consider that these changes will not only be surgical and scientific ones but will also be significantly impacted by artificial intelligence and by politically driven decisions and socio-economic considerations. We will therefore not only discuss the present innovative scientific results of our researchers and clinicians but also look into the development of new remuneration concepts and their combination with evolving AI-software. Finally, we will have a glimpse at the history and legacy of Swiss Plastic Surgery, and will look at lessons learned from the past.

All of the above will take place in the charming environment of Lake Lugano on which we will enjoy in addition to the meeting also a boat trip and a lakeside networking dinner.

We are looking very much forward to an exciting and fruitful time together in Lugano.

Prof. Dr. med. Mihai Constantinescu
President Swiss Plastic Surgery

PAST - PRESENT - FUTURE

Chères et chers collègues,

Bienvenue à Lugano !

Le **PASSÉ** forge les connaissances et rappelle le chemin parcouru dans notre spécialité de chirurgie plastique, reconstructive et esthétique. Que ce soit les techniques de base, l'approche humaine et la sécurité de nos patients, nous essayons sans relâche d'améliorer leur prise en charge et leur sécurité.

Le **PRÉSENT** met en pratique les progrès actuels dans une recherche de qualité des résultats apportés à notre patientèle, une collaboration toujours active avec les autres spécialités. Nos 2 sociétés collaborent et ont à cœur d'offrir la meilleure formation possible aux jeunes collègues par des échanges et des facilités d'enseignement. Les nouveaux moyens à disposition (Internet, IA) et de traitement (bio médecine, robotique).

Le présent est aussi une lutte contre les non-médecins, en particulier en médecine et chirurgie esthétique, qui la pratiquent au mépris des règles et des lois. Le présent est aussi la recherche d'un compromis acceptable entre les assureurs et les médecins sur l'épineux problème des valeurs financières des prestations médicales.

Le **FUTUR**, c'est déjà maintenant, nouvelles techniques, nouvelles exigences, nouvelles recherches, mais le futur est surtout VOUS, les jeunes chirurgiens plasticiens qui (portes par nous) être notre avenir.

PROFILO® STRUCTURA

WHERE OTHERS SEE HYALURONIC ACID, WE SEE BEAUTY BEYOND THE SURFACE.

From IBSA's experience with hyaluronic acid comes PROFHILO® STRUCTURA: the new frontier of adipose tissue restoration in response to aging.

The only stable Hybrid Cooperative Complexes (HCC) of high and low molecular weight *Ultrapur*e Hyaluronic Acid in very high concentration, produced with NAHYCO® Technology — a unique and innovative thermal production process patented by IBSA.
